Enbridge's economic impact on British Columbia

Enbridge, a North American energy delivery leader, was established in 1949 and exists to fuel people's quality of life.

We move a very large slice of North America's oil, natural gas and natural gas liquids, safely and reliably. We operate North America's premium natural gas transmission franchise, the world's longest and most complex crude oil and liquids pipeline network, and a blue-chip natural gas utility business.

 These activities deliver a variety of economic benefits to multiple Canadian provinces and territories – and these aspects of our operations also fuel people's quality of life, whether they're:

- well-paying jobs in towns and cities;
- tax revenue that can help build schools, hospitals and roads;
- procurement spending that stimulates local economies; or
- grants and volunteer labor for community-strengthening projects.

As the world's population grows, we'll need all forms of energy to meet rising global demand. Enbridge is committed to reaching net-zero GHG emissions by 2050. As a diversified energy company, we are uniquely positioned to help accelerate the global transition to a cleaner energy

future, while at the same time delivering a secure and affordable supply of energy.

We recognize that the energy transition requires a practical approach. At Enbridge, we're committed to lowering emissions while meeting growing energy demand; to supporting our customers today while anticipating their needs tomorrow; and to meet that demand, developing new energy sources while keeping energy costs in check.

We're proud to deliver economic benefits in the Canadian provinces and territories, and the U.S. states, where we do business.

Energy assets, operations and projects

Enbridge's operations, projects, and/or asset ownership interests in British Columbia include:

- The Aspen Point Program, an expansion of the T-North section of our BC Pipeline, which will provide up to 535 million cubic feet per day (MMcf/d) of new transportation capacity. Projected in-service date is 2026.
- Aux Sable Canada's gas processing facilities (the Septimus Pipeline) upstream of the Alliance Pipeline.
- The BC Pipeline, which travels from Fort Nelson and Gordondale to the Canada-U.S. border at Huntingdon/Sumas, and has been the backbone of the province's natural gas industry since 1957.
- The Sunrise Expansion Program, an expansion of the T-South section of our

For more detailed information on Enbridge's infrastructure, projects and/or community investment activity in British Columbia, please visit our online interactive map at **Enbridge.com/map**

BC Pipeline, which will provide up to 300 million cubic feet per day (MMcf/d) of new transportation capacity. Projected in-service date is 2028.

 A 30% ownership stake in the Woodfibre LNG project, a 2.1 milliontonne-per-year liquefied natural gas (LNG) export facility near Squamish, BC. Projected in-service date is 2027.

2022 economic benefits at a glance

Our workforce

Enbridge's people live and work in communities like yours as colleagues, neighbors and friends. Much of the salary earned by Enbridge employees is injected directly into the local and provincial/territorial economies.

We have a workforce of more than 12,000 people, primarily in Canada and the United States, with major Canadian offices in Calgary, Toronto, Edmonton and Chatham, ON.

	B.C.	Canada
Permanent and temporary employees,	206	8,514
and provisioned contractors, at year's end		
Total wages paid to permanent and	\$20.3M	\$831M
temporary employees		

Tax revenue

Enbridge's presence in the community fuels quality of life through ongoing tax revenue. We pay property taxes on our pipelines and related facilities—such as terminals, storage facilities, pump stations, compressor stations, and energy generation facilities—as well as corporate income tax and other taxes, including carbon tax, payroll tax, fuel tax, and excise tax.

This revenue can be used for schools, infrastructure (roads and bridges), health and wellness, recreation, transportation and other services that help strengthen the fabric of the community.

	\$67.2M

Economic spinoffs*

Enbridge's ongoing operations, and planned projects, continue to stimulate local and regional economies. Through procurement spending, we're helping to create indirect employment, support local businesses, and establish economic spinoffs.

Our capital expenditures include such items as pipe steel, equipment purchases and replacement, system integrity-related investments, and capital leases. Meanwhile, our operating and administrative expenditures include such items as maintenance costs, equipment leases, power consumption, and field personnel salaries and wages.

	B.C.	Canada
Capital expenditures	\$341.7M	\$2.2B
Operating and admin expenditures	\$376M	\$3.7B

^{*} All amounts are based on annual forecasting estimates which, while reasonably accurate, may not align precisely with procurement spending totals reported elsewhere by Enbridge and may not reflect actual amounts spent.

Community investment

Enbridge is committed to supporting and strengthening the communities near our pipelines and facilities, and being a good neighbor is very important to us. Every year across North America, we support thousands of not-for-profit agencies whose initiatives align with one or more of our three focus areas—health and safety, environment, and community.

- Our Fueling Futures program, launched in 2021, has unified our approach to corporate citizenship and the ways we energize communities through corporate donations and strategic partnerships, sponsorships, and a robust employee volunteering and giving program.
- Enbridge's various employee-driven United Way campaigns from across the U.S. and Canada help sustain community outreach, poverty reduction, and educational initiatives being coordinated by United Way chapters near Enbridge's projects and operations. Our United Way campaign totals include employee donations, special events, and corporate matching.
- In 2022, through our Safe Community First Responder
 Program, we donated more than \$1.1 million to 86 Canadian emergency responder organizations located near Enbridge's projects and operations; these donations are earmarked for safety equipment, professional training or safety education programming that keeps communities safe.

A leader in energy delivery

Enbridge is North America's premier energy infrastructure company, transporting about **30%** of the crude oil produced in North America and moving about **20%** of all natural gas consumed in the United States.

Liquids pipelines

Enbridge operates the world's longest and most complex crude oil and liquids transportation system, with about **28,600 km (17,800 miles)** of active pipe across North America. That includes about **13,700 km (8,500 miles)** of active pipe in Canada.

Barrels of crude and liquids delivered daily, on average

of U.S.-bound Canadian crude production

of total U.S. crude imports

Natural gas transmission and midstream

Unrivaled in the industry due to their scale, scope and connectivity, Enbridge's natural gas transmission and midstream pipeline assets cover about **118,700 km or 73,800 miles** (including assets owned and operated by DCP Midstream, a joint venture between Enbridge and Phillips 66) across 30 American states, five Canadian provinces and offshore in the Gulf of Mexico.

161.7B

cubic feet (Bcf) of net working storage through our natural gas transmission operations

707K

bpd of NGLs produced by DCP Midstream, a JV between Enbridge and Phillips 66

Natural gas utility

Enbridge Gas Inc. is North America's largest natural gas utility by throughput and third-largest by customer count. Enbridge Gas and its affiliates serve about **15 million people** through **3.9 million** meter connections in Ontario and Quebec.

cubic feet per day (Bcf/d) of gas distributed to residential, commercial and industrial customers

of gas transportation/ distribution mainlines and service lines

cubic feet (Bcf) of net working storage through our natural gas distribution operations

Renewable energy

Since 2002, we've committed more than **\$8 billion** in capital to renewable energy and power transmission projects currently in operation or under construction. Our green energy portfolio includes **23** wind farms, **16** solar energy operations, **5** waste heat recovery facilities and **1** geothermal project, and we're expanding our presence in European offshore wind.

of zero-emission energy generated*

^{*} projects currently in operation or under construction

The big picture: Connecting supply with demand

Enbridge is a global energy infrastructure leader. Our diversified assets are balanced between natural gas and oil, connecting key supply basins and demand markets across North America.
