

Enbridge's economic impact on British Columbia

At Enbridge, our goal is to be the first-choice energy delivery company in North America and beyond – and for 75 years, we've delivered the energy that fuels quality of life.

We move about 30% of the crude oil produced in North America, we transport nearly 20% of the natural gas consumed in the U.S., and we operate North America's largest natural gas utility by consumer count. We were an early investor in renewable energy, and we have a growing offshore wind portfolio.

- These activities **deliver a variety of economic benefits to multiple Canadian provinces and**

territories – and these aspects of our operations also fuel people's quality of life, whether they're:

- **well-paying jobs** in towns and cities;
- **tax revenue** that can help build schools, hospitals and roads;
- **procurement spending** that stimulates local economies; or
- **grants and volunteer labor** for community-strengthening projects.

As the world's population grows, we'll need all forms of energy to meet rising global demand. Enbridge is committed to reaching net-zero GHG emissions by 2050. As a diversified energy company, we are uniquely positioned to help accelerate the global transition to a cleaner energy

future, while at the same time delivering a secure and affordable supply of energy.

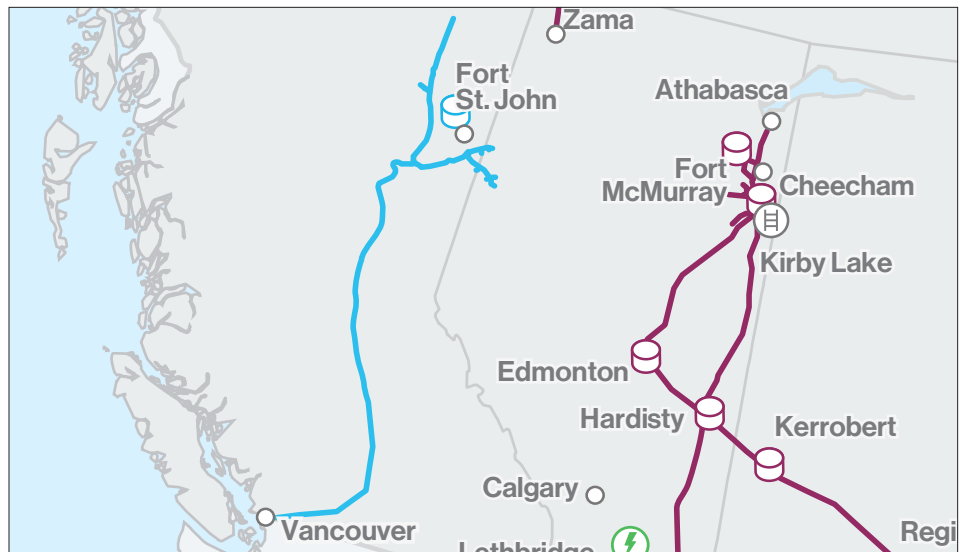

We recognize that the energy transition requires a practical approach. At Enbridge, we're committed to lowering emissions while meeting growing energy demand; to supporting our customers today while anticipating their needs tomorrow; and to meet that demand, developing new energy sources while keeping energy costs in check.

We're proud to deliver economic benefits in the Canadian provinces and territories, and the U.S. states, where we do business.

Energy assets, operations and projects

Enbridge's operations, projects, and/or asset ownership interests in British Columbia include:

- The **Aitken Creek Natural Gas Storage** facility, about 120 km northeast of Fort St. John, which is the largest and only underground natural gas storage facility in British Columbia, with 77 billion cubic feet of working gas capacity.
- The **Aspen Point Program**, an expansion of the T-North section of our BC Pipeline, which will provide up to 535 million cubic feet per day (MMcf/d) of new transportation capacity. Projected in-service date is 2026.
- The **BC Pipeline**, which travels from Fort Nelson and Gordondale to the Canada-U.S. border at Huntingdon/Sumas, and has been the backbone of the province's natural gas industry since 1957.
- The **Sunrise Expansion Program**, an expansion of the T-South section of our BC Pipeline, which will provide up to 300 million cubic feet per day (MMcf/d) of new transportation capacity. Projected in-service date is 2028.
- A 30% ownership stake in the **Woodfibre LNG** project, a 2.1 million-tonne-per-year liquefied natural gas (LNG) export facility near Squamish, BC. Projected in-service date is 2027.

- Bcf/d – billion cubic feet per day
- Bcf – billion cubic feet
- NGL – natural gas liquids
- MW – megawatt

A leader in energy delivery

Enbridge is North America's premier energy infrastructure company, transporting about **30%** of the crude oil produced in North America and moving about **20%** of all natural gas consumed in the United States.

Liquids pipelines

Enbridge operates the world's longest and most complex crude oil and liquids transportation system, with about **28,600 km (17,800 miles)** of active pipe across North America. That includes about **13,700 km (8,500 miles)** of active pipe in Canada.

3M+

Barrels of crude and liquids delivered daily, on average

65%

of U.S.-bound Canadian crude production

40%

of total U.S. crude imports

Natural gas transmission and midstream

Unrivaled in the industry due to their scale, scope and connectivity, Enbridge's natural gas transmission and midstream pipeline assets cover about **118,700 km or 73,800 miles** (including assets owned and operated by DCP Midstream, a joint venture between Enbridge and Phillips 66) across 34 American states, six Canadian provinces and offshore in the Gulf of Mexico.

24.6B

cubic feet per day (Bcf/d) of natural gas transported

273.8B

cubic feet (Bcf) of net working storage through our natural gas transmission operations

707K

bpd of NGLs produced by DCP Midstream, a JV between Enbridge and Phillips 66

Natural gas utility

Enbridge Gas Inc. is North America's largest natural gas utility by throughput and third-largest by customer count. Enbridge Gas and its affiliates serve about **75% of Ontario residents**, and have **3.9 million** meter connections in Ontario and Quebec.

6B

cubic feet per day (Bcf/d) of gas distributed to residential, commercial and industrial customers

151,500 km

of gas transportation/distribution mainlines and service lines

290.8B

cubic feet (Bcf) of net working storage through our natural gas distribution operations

Renewable energy

Since 2002, we've committed more than **\$9 billion** in capital to renewable energy and power transmission projects currently in operation or under construction. Our green energy portfolio includes **23** wind farms, **16** solar energy operations, **5** waste heat recovery facilities, **1** geothermal project and **1** power transmission line, and we're expanding our presence in European offshore wind.

5,304^{MW}_{GROSS}

The big picture: Connecting supply with demand

Enbridge is a global energy infrastructure leader. Our diversified assets are balanced between natural gas and oil, connecting key supply basins and demand markets across North America.
